Plan Overview

RuralMedEd is committed to ensuring a safe and healthy work environment for staff and visitors upon the return to the physical work environment as restrictions are eased regarding COVID-19. This plan enables this commitment to be operationalised in line with the requirements of Work Safe Australia National COVID-19 safe workplace principles and in line with current CHO directives.

Safe Workplace Principles

Safe Work Australia has issued National COVID-19 safe workplace principles which were agreed to by the National Cabinet in late April 2020, along with accompanying resources to assist business resume operations at workplaces following the strict isolation requirements relating to COVID-19. These resources can be found at the Safe Work Australia Website. Worksafe QLD has provided guidance to employers and workers about keeping your workplace safe, clean, and Healthy which can be found here.

These principles are as follows:

1. All workers, regardless of their occupation or how they are engaged, have the right to a healthy and safe working environment.
 2. The COVID-19 pandemic requires a uniquely focused approach to work health and safety (WHS) as it applies to businesses, workers, and others in the workplace.
 3. To keep our workplaces healthy and safe, businesses must, in consultation with workers, and their representatives, assess the way they work to identify, understand, and quantify risks and to implement and review control measures to address those risks.
 4. As COVID-19 restrictions are gradually relaxed, businesses, workers and other duty holders must work together to adapt and promote safe work practices, consistent with advice from health authorities, to ensure their workplaces are ready for the social distancing and exemplary hygiene measures that will be an important part of the transition.
 5. Businesses and workers must actively control against the transmission of COVID-19 while at work, consistent with the latest advice from the Australian Health Protection Principal Committee (AHPPC), including considering the application of a hierarchy of appropriate controls where relevant.
 6. Businesses and workers must prepare for the possibility that there will be cases of COVID-19 in the workplace and be ready to respond immediately,
-

appropriately, effectively, and efficiently, and consistent with advice from health authorities.

7. Existing state and territory jurisdiction of WHS compliance and enforcement remains critical. While acknowledging that individual variations across WHS laws mean approaches in different parts of the country may vary, to ensure business and worker confidence, a commitment to a consistent national approach is key. This includes a commitment to communicating what constitutes best practice in prevention, mitigation and response to the risks presented by COVID-19.
8. Safe Work Australia (SWA), through its tripartite membership, will provide a central hub of WHS guidance and tools that Australian workplaces can use to successfully form the basis of their management of health and safety risks posed by COVID-19.
9. States and Territories ultimately have the role of providing advice, education, compliance, and enforcement of WHS and will leverage the use of the SWA central hub in fulfilling their statutory functions.
10. The work of the National COVID-19 Coordination Commission will complement the work of SWA, jurisdictions and health authorities to support industries more broadly to respond to the COVID-19 pandemic appropriately, effectively, and safely.

Employer Requirements

Employers are required to take action to protect workers and others at the workplace from the risk of exposure to COVID-19 so far as is reasonably practicable. This includes implementing the public health measures issued by health authorities including Queensland Health and the Australian Government Department of Health. These requirements include but are not limited to:

- having a plan in place to respond to issues related to COVID-19 in the workplace, taking into account current CHO directives.
 - reviewing exposure and infection control policies and procedures, actively promoting social distancing, good hand and respiratory hygiene, and increasing cleaning of common areas within the work environment.
 - identifying risks and develop and implement safe systems of work (in consultation with workers and/or their Health and Safety Representatives (HSRS) that take into account directions and advice provided by health authorities.
-

- monitoring the COVID-19 situation as it develops, relying on information from authoritative sources such as public health authorities.
- providing hand washing facilities and ensuring these are kept clean, properly stocked and in good working order.
- providing soap or alcohol-based hand sanitiser, tissues and cleaning supplies.
- promoting good hygiene practices, e.g. displaying hand hygiene posters.
- Keeping the workplace clean and hygienic.
- managing psycho-social risks for workers; and
- communicating, training and supervising workers on workplace measures to address COVID-19.

Employee/ Student Requirements

All employees/students must take reasonable care for their own health and safety, and the health and safety of others in their workplace. They must co-operate with any reasonable policy or procedures that relates to health or safety at work.

Employees/students are required to ensure a high standard of cleanliness and hygiene is maintained in the workplace.

Employees/students are required to:

- Stay home if unwell. Do NOT attend the workplace/campus if you are feeling unwell and/or have any signs or symptoms of a respiratory disorder or COVID-19.
 - Maintain 1.5m social distancing. Observe rules of social distancing both within and outside the workplace.
 - Ensure good hygiene.
 - Wash your hands regularly with soap and water or alcohol-based hand sanitiser
 - Cover your nose and mouth with a tissue or bent elbow when coughing or sneezing, dispose of used tissues immediately after use in a bin and wash your hands or apply hand sanitiser.
 - Avoid touching your face, nose, and mouth.
 - Abstain from shaking hands.
 - Frequently clean and disinfect communal areas and shared working spaces.
-

- Follow current CHO directives as advised.
- Mask wearing if social distancing is not possible or as directed.

Notification Requirements for COVID-19 positive test result or close contact

Please advise your supervisor if positive test and follow directions to isolate for 7 days (return on Day 8).

If close contact and no symptoms, wear a mask for 7 days and perform RAT every 2 days till Day 6.

If close contact and symptoms perform a RAT – if negative do not present to work until symptom free or Day 8. Work from Home arrangements will be made.

It is also a requirement to notify QHealth [Rapid Antigen Test \(RAT\) positive result registration form](#)

Managing Risks

Health, Safety and Environment Risks

RMEA will identify and work with the management team to identify COVID-19 specific risks in the workplace and establish a program of mitigation strategies to minimise the risks. RMEA staff members will ensure their work areas are kept up to date and provided with information and processes regarding safe work practices and minimisation of the impact of COVID-19 within the work area.

Risk Minimisation Strategies

The minimisation strategies will be agile and evolve over time as new priorities occur and emerging risk arises. Initial strategies will include but are not limited to:

- Staff and student education and information including ongoing promotion of social distancing and safe hygiene practices
 - Reminders for staff/students to wash hands with soap and water very regularly and sanitise if it is not possible to wash
 - Provision of essential hygiene products for all work areas
 - Increased cleaning activities, involvement, and instructions
-

- Oversight of staff/student health
- Carefully planned workstations and teaching sessions to ensure social distancing is maintained
- Installing air filtration systems if air circulation cannot be achieved.

Staff/Student Education and Information

- Staff/students will be informed of the Safe Workplace Plan prior to returning to work
- All staff/students will be advised of their obligations to ensure safety for themselves and others in the workplace
- Relevant training and all return to the workplace information will be made available and accessed through RMEA internal intranet page and will be updated on a regular basis.

Cleaning and Hygiene Products

All office, public and staff workplace areas will have cleaning and hygiene products available for maintaining a safe work environment.

RMEA will provide each office with access to antibacterial wipes, hand sanitiser, disinfectant spray, paper towels and any other equipment to ensure we are providing the cleanest working environment possible.

Each office has a commercial cleaner who provides cleaning services at a minimum of once per week. These cleaners are responsible for maintaining high standards of hygiene within all areas of our offices including wiping down of individual workspaces, meeting room tables and chairs, removing rubbish from the offices and kitchen areas.

All Staff will be responsible for incidental cleaning and/or disinfecting (if required) of all surfaces they have touched or come into contact with including but not limited to:

- Individual work areas
 - Company vehicles - wipe down all surfaces, spray seats upon leaving
 - Opening and closing doors - office, meeting rooms etc,
 - Light switches, Water cooler etc,
 - Office equipment - meeting tables, chairs, desks, computers, keyboards, photocopiers, computers and video conference equipment in meeting rooms,
-

- Kitchen equipment - benches, cutlery, crockery and other dishes, dishwasher and fridge, tables, and chairs.

Monitoring Staff/Student Well-Being

- RMEA will continue to encourage our staff/students to maintain their health.
- Staff/students are not to attend the workplace if they are sick or have any signs of respiratory illness. Staff will be required to check in with their line manager if they are unwell.
- Staff/students to follow CHO directives regarding symptoms, testing, household contacts.
- Vulnerable or immunocompromised staff are able to request continuation of their flexible work arrangements through their Line Manager.
- Contact your Line Manager or CEO for Employee Support Assistance.
- Coronavirus Mental Wellbeing Support Service provided by Benestar.

Social Distancing in the Workplace

Staff/students are required to practice a high level of awareness in maintaining physical distancing whilst in the workplace. This Checklist will assist in guiding staff/students of the requirements. Specifically, these are:

COVID-19 Safe Workplace Plan

Teaching Sessions:

- Masks as directed
- One (1) person per 1.5 square meters in enclosed spaces

Office Work:

- One (1) person per 1.5 square meters in enclosed spaces
 - Maintain 1.5m distance between each person
-

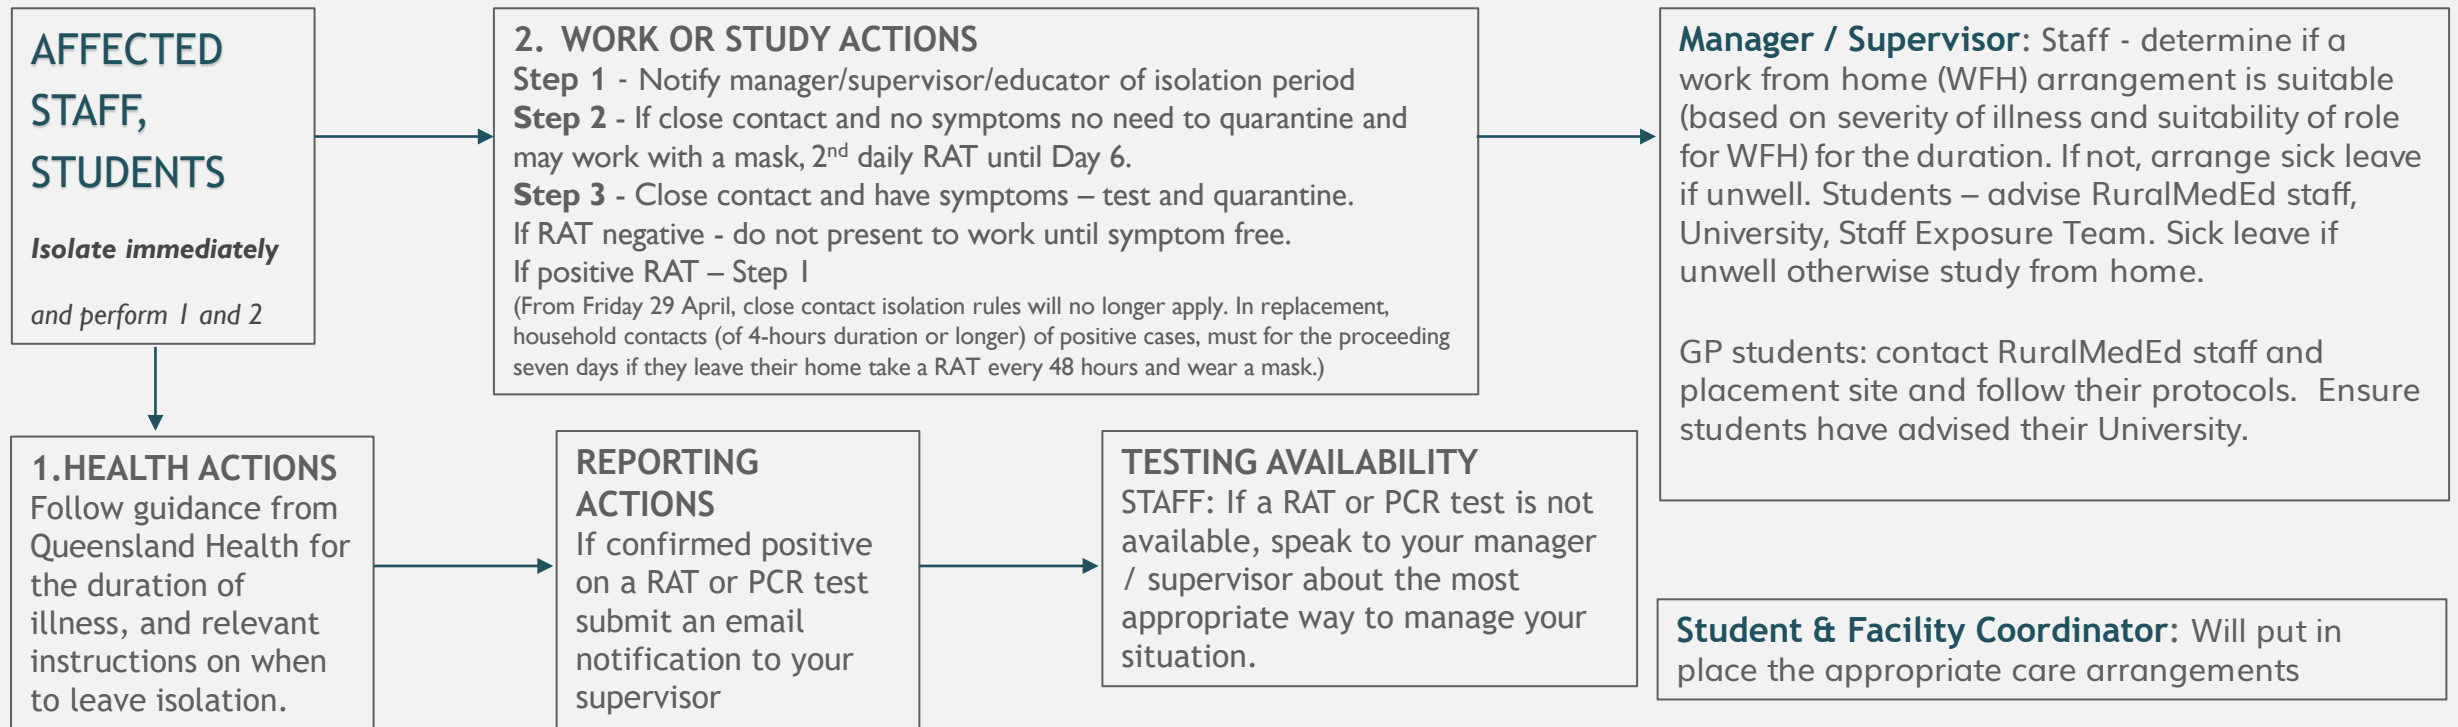

General Information and Resources

We encourage ALL staff to review our RMEA COVID-19 webpage and keep updated with the latest information available from the Public Health Units, Department of Health and Queensland Health. Please see information below for external links:

-

Staff or Student with symptoms, Confirmed Positive for COVID-19, Close Contact

Residents in RuralMedEd accommodation with symptoms, Confirmed Positive for COVID-19, Close Contact

Follow the above actions for study and testing arrangements, and in addition:

Affected Resident

Residents who start experiencing COVID-19 symptoms, or have other concerns or questions
ISOLATE IMMEDIATELY and contact local RuralMedEd staff, local Staff Exposure Team and advise University/Manager

RMEA Strategic Plan

Our objectives

Educate the rural health workforce

Establish a pipeline of rural health learners and trainees

Innovation in education

Improve rural health in our communities through collaboration, research and workforce sustainability

We will achieve our objectives

With a faculty of highly valued, skilled rural clinical academics and researchers leading

Aspire2Health - our high school program inspiring rural students to study health

QRME Training - a VET program for rural students providing a pathway to a career in rural health

Longlook - the rural longitudinal clinical program for Griffith University medical students

GPrEP - innovative general practice training program training doctors in rural general practice

Our values

Collaboration

Innovation
